DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on December 26, 2006 has been entered.

Claim Objections

2. Claims 14, 15, 21, 28, and 30 are objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form.

Claim 1, the last line now recites that, "the organic valence stabilizer is not a carboxylate" (emphasis added by the Examiner). Thus claim 1 precludes the organic stabilizer from being a carboxyl ate. However, each of claims 14, 15, 21, 28 and 30 recite a Markush group listing the organic valence stabilizers. Each of these Markush groups includes carboxylates. In view of this, dependent claims 14, 15, 21, 28 and 30

Art Unit: 1742

do not further limit independent claim 1 but rather actually attempt to broaden the scope of coverage.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claim 14 and dependent claims 15 to 36 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

I. In amended claim 14, the newly added language, "thio-, amido-, or imido-derivatives of phosphonic and diphosphonic acids and salts" (claim 14, lines 31 and 32) does not find support in the application as filed and therefore is new matter.
